

5 September 2022

Dear Residential Care residents, families and visitors

I write to inform you that we currently have one resident in our Lillipilli wing who has tested positive to COVID-19. This resident is now isolating in their room.

In line with our COVID-19 outbreak management protocols we have conducted testing of all other Lillipilli residents. All have returned a negative result following their Rapid Antigen Test. PCR tests have also been undertaken today and sent to pathology.

Whilst the wing is closed, Lillipilli residents are still be able to move about within their section of the wing, which has been separated as an additional precaution.

The rest of our Residential Care Facility is operating normally within our COVID-19 safe systems and precautions.

We will keep you informed as we receive further results.

Very best
