

28 June 2023

Dear Residential Care residents, families and visitors

Since my last communication the majority of residents in our Serpentine wing who tested positive for COVID-19 have now recovered.

This is wonderful news and means that we are in a position to re-open Serpentine wing. All Serpentine residents who have completed their isolation period are now able to move about the facility as normal.

We are hopeful of recommencing group activities next week, which will be welcome news for many of our residents and visitors.

Thank you again for working with us in our response to COVID-19 Outbreaks.

Kind regards
