

30 April 2022

Dear Residential Care residents and families,

Following the two memos sent to you this week I'm writing to keep you up-to-date regarding our COVID-19 status in our Missingham wing within our Residential Care Facility.

We now have a total of five residents in our Missingham wing who have tested positive to COVID-19.

All are receiving great care led by our Clinical Manager Kelly Roberts (Nurse Practitioner) and under the direction of our GPs.

The Missingham wing is currently isolated from the rest of the facility as an added precaution.

It's good to remember the vast majority of our residents are fully vaccinated and have received booster shots, which as we know reduces the severity potential of COVID-19.

As mentioned in my Thursday memo, our testing regime and close clinical monitoring of all residents is ongoing. Serpentine and Riverview wings continue to return negative results and residents in Banksia, Prospect, Lillipilli and Rosebank remain unaffected.

Ongoing COVID-19 testing is very important and we continue to do this so that we are in control, as best we can, of any potential additional transmission.

We continue to liaise with the Local Public Health Unit and have received positive feedback regarding our management of the outbreak.

I will continue to keep you informed as things progress.

Please share with family and friends who may not be on our mailing list.

Kind regards

Michael Penhey
CHIEF EXECUTIVE OFFICER
