Dear Residential Care residents and families

I am pleased to report as we have had no new recorded cases of COVID-19 in our Missingham wing, we are now hopeful of enabling visits for those residents in the next few days.

This is great news for Missingham residents and their families.

Our clinical teams and staff have done a great job containing the situation. All our residents who had COVID are doing well. And we are grateful for the support and understanding we have received from families at this time.

We continue with ongoing COVID-19 testing across our Residential Care Facility, which, as you can appreciate, has become a "normal part of life" here at Crowley. And we think it will be this way for some time to come.

Wishing all our mothers a beautiful Mother's Day this Sunday.
